

We see ourselves as a leading development partner and supplier for specific movement technique in the motor vehicle, and thus as a reliable partner to the automotive industry. We identify with the demands and expectations of our customers to achieve greatest level of satisfaction!

The following priorities form the basis for this purpose:

1. Complying with relevant statutory obligations
2. Energetic evaluation, improvement of energy performance
3. Implementation of requirements or expectations of our customers and other interested parties
4. Maintenance and ongoing improvement of management systems
5. Implementation and monitoring of coordinated corporate targets
6. Prevention of pollution by minimizing significant environmental effects
7. Protect the health of employees
8. Consideration of environmental and safety aspects in the necessary product and process development and in creating infrastructures
